Life begins at

BRIDGE HOUSE

With a design brief to architects S&SA of Harrogate and built to The Fisher Care Group's specific requirements by Marshall (Building Contractors) Ltd, Bridge House is an innovative unique home relevant to the area of Brighouse.

Set in a 200-year-old protected wood known as Elmwood, we have brought the outside-inside. Built on four levels, the ground floor is large, light and brightly decorated. There are balconies to the ground floor day rooms and a café surrounded by glass which opens the woodland views. Bridge House is representative of former mills in the area, with a twist, having a roof top garden and a glass frontage.

Our residents can relax in the music room which is dedicated to the Brighouse and Rastrick Band. The band has a history of success and great importance to the people of Brighouse. The Ground Floor at Bridge House has a Café that will be open for all in the community, a house kitchen for residents to bake and cook as they please, a hair and nail studio, function room, games room, cinema/TV room that has a state of the art projector system, where classic

films, sports and events can be enjoyed by all. There is also a garden room for our 'Gardener's Club'.

Included in Bridge House is a Day Care Centre fitted out to a high specification and will be delivering an extensive schedule of activities.

The further three floors accommodate 66 bedrooms with en-suite wet rooms, the second floor is solely designated to Nursing residents.

Tastefully decorated and furnished the first, second, and third floor each has its own day space with extensive views over the local area. Residents can enjoy meals snacks and socialising with each other, relatives, friends and family. Bridge House also has an amazing roof-top garden with magnificent extensive breath-taking views.

Bridge House has been designed for the community that is focused on the health and wellbeing of everyone who stays with us. Embracing families, friends and professionals, all working alongside us to deliver excellence in care.
